| General Comments | FEE welcomes this paper as useful guidance to national competent authorities. The requirement that internal model companies submit the capital requirements using both the standard formula and internal model will lead to significantly more work for these firms. | |

| 1.2 | | |
| 1.3 | | |
| 1.4 | | |
| 1.5 | National competent authorities will be receiving a lot of information from undertakings and will have to process it. This extra knowledge brings its own additional burden on national competent authorities and they will need to demonstrate how all this additional information enhances supervision effectiveness. | |
| 1.6 | | |
| 1.7 | | |
| 1.8 | | |
| 1.9 | | |
| 1.10 | It is stated here that NCAs - in case they choose to comply with the guidelines - will not be expected to take enforcement or regulatory action as a consequence of the reporting in the preparatory phase. So, obviously regulatory action is not required. However, there is a lack of clarity on the NCA's ability to enforce the guidelines if they want to do that. | |

| Section II. General Comments | | |
| 1.29 | The requirement, that national competent authorities should ensure that insurance and reinsurance undertakings are included in a way, that at least 80 % of the national market share should be represented is imprecise. It does not become clear, how it has to be decided from the perspective of a (small or mid-size) single undertaking if it is within or out of the 80 %-threshold. So, in order to clarify the scope there should be criteria, how it has to be defined. In addition defining the thresholds in relation to the market share on the solo level may lead to problematic implications for the group reporting. E.G. the following szenario is possible: It can happen that a group has to apply group reporting although some of its entities are not within the solo-threshold. This seems adequate as long as it affects the small subsidiaries of a group. But the identification relative to the national market share may mean that although a subsidiary is of great importance for a group it does not have to apply the solo-reporting (and is not prepared to deliver its data to the group) because of being insignificant enough in relation to the na | |
| 1.30 | The comment to 1.29 applies accordingly to the 50 % threshold. | |
| 1.31 | | |
| 1.32 | | |
| 1.33 | See comment to 1.29 above. In addition it is not specified which accounting basis should be applied for the calculation of technical provisions. | |

| 1.37 | In the guideline proposal it is stated that all quantitative data is submitted in units. We wonder if a rounding to thousands is also allowed and think it should be for reasons of materiality. | |

| 1.47 | | |
| 1.48 | The proposal, that internal model users should provide information on SCR-calculation also based on the standard formula (in addition to the reporting of the internal model outcome) means a significant workload for the undertakings. Neither the framework directive nor the draft level 3 standards published so far require a parallel calculation and reporting; so we wonder, if the requirement is necessary. | |
| Section III. General Comments | The detailed reporting requirements demand the existence of processes to generate the numbers which also are defined in detail. Many insurers do not have implemented such processes yet (or not in detail) as for the QIS many shortcuts were allowed which do not seem to be allowed now. | |
| 1.49 | | |
| 1.50 | It should be explained in more detail how ring fenced funds are defined respectively how the definition has to be applied. This is especially important given, that certain system requirements depend on the ring fenced funds definition and later amendments would be costly. | |
| 1.51 | | |
| 1.52 | The guideline proposed here lists the MCR as a quarterly solo requirement. In contrast, the policy options included in the impact assessment suggest the MCR only as an annual solo requirement (see question 2 page 248 et seq. and appendices 1-3, page 266 et seqq.). This should be clarified. | |

| 1.79 | Especially because of the huge administrative burden on firms to be able to meet both Solvency I (solo and group) reporting and the interim guideline submissions the timeframes suggested for annual reporting seem to be too short. Perhaps a solution could be leaving the decision about deadlines to national supervisory authorities as the effort necessary for an insurance company in a specific country to fulfill the preparatory requirements does also depend on how the solvency I reporting in the respective country looks like. | |

| OF-B1Q- cell A17 | It does not become clear to us what has to be included here: Is a total of non-available own funds related to non-EEA entities for all types of own funds (eg share capital, preference shares etc) meant whereas for EEA entities these non-available items are presented seperately under each own fund type? Or should a subset be included here, so does the line exist for disclosure purposes only? | |
